

ECG embeddings as proxies for unmeasured physiology in 18 emulated cardiovascular trials

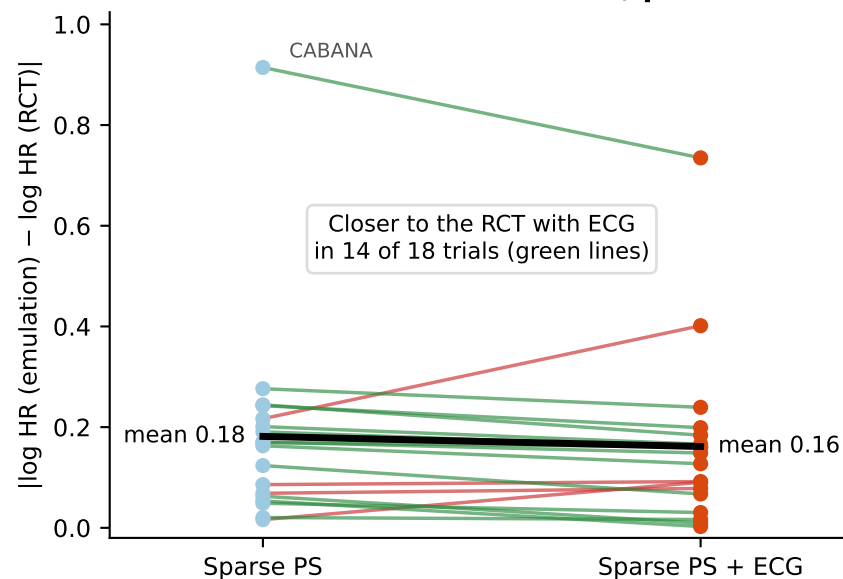

A Balance on physiology not included in any PS

Sparse PS hdPS Clinical PS
Sparse PS + ECG hdPS + ECG

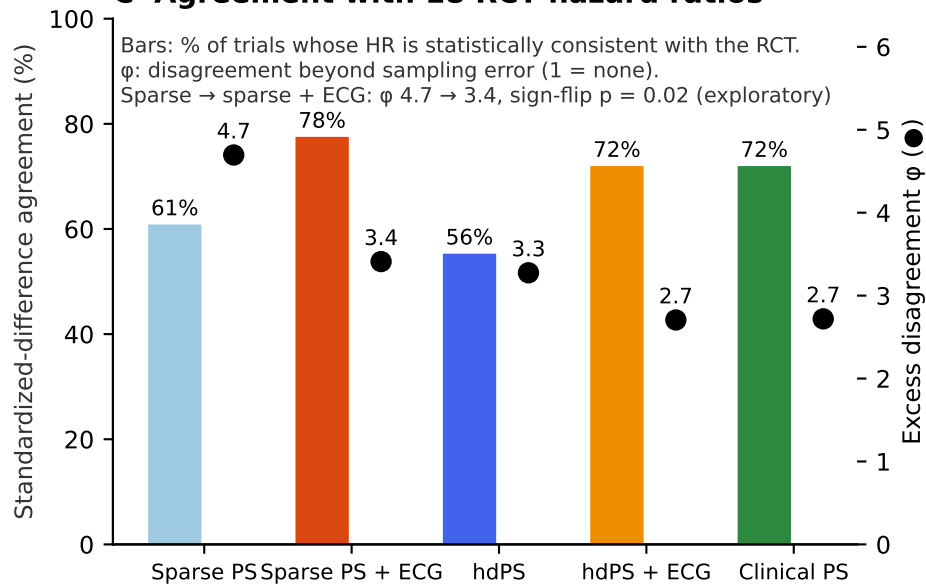

Median over 8 physiology-driven trials (echo, core vitals/labs never entered any PS); values capped at 100%.

B Distance from the RCT result, per trial

C Agreement with 18 RCT hazard ratios

D Known-truth simulation (18 trials)
